

Submission Worksheet

Submission Data

Course: IT114-450-M2025

Assignment: IT114 Module 1 Checkpoint

Student: Colin R. (ctr26)

Status: Submitted | **Worksheet Progress:** 100%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 6/4/2025 1:40:27 PM

Updated: 6/4/2025 2:21:33 PM

Instructions

- Overview Video: <https://youtu.be/xIS-nqFfink>

1. Ensure you've followed the lessons to set up your GitHub, git, and VS Code
2. Fill in the below tasks (note: it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to GitHub in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

Section #1: (10 pts.) Tasks

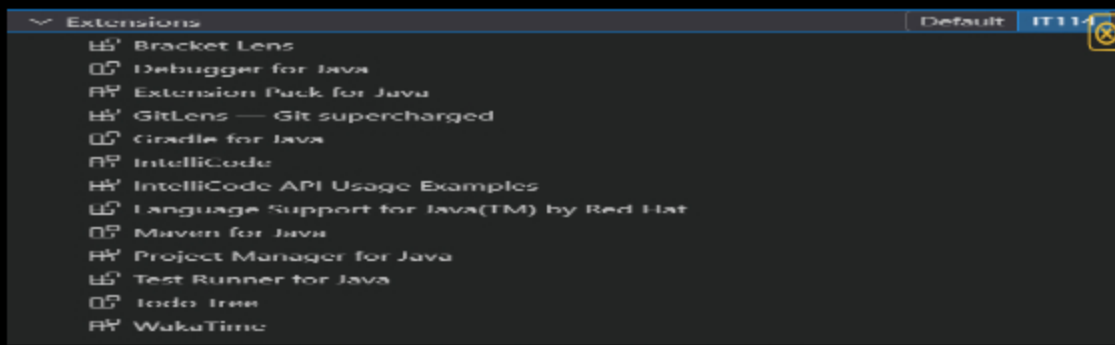

Progress: 100%

Task #1 (2.22 pts.) - Screenshot of VS Code Extensions for this class

Progress: 100%

Details:

- Ensure you have the following extensions
- Java (Oracle's, RedHat's or any other valid one)
- WakaTime
- Git Lens

A picture of my IT114 profile with all of the extensions installed.

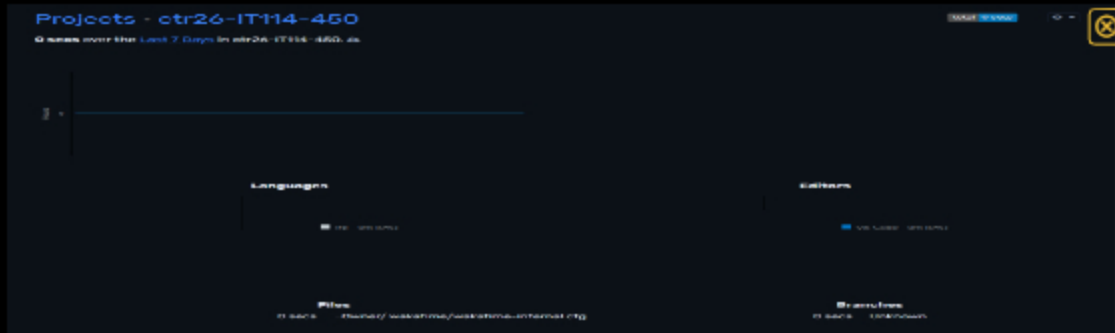

Saved: 6/4/2025 1:40:58 PM

Task #2 (2.22 pts.) - Screenshot of WakaTime Setup

Progress: 100%

Details:

- Visit the WakaTime site
- Click the "Projects" tab and find your repository and select it
- Include a screenshot of the top part that shows the overall time and the repository name
- Scroll down and screenshot the bottom portion that shows the individual files/branches and include that. (You won't need to capture the visuals)

Task #3 (2.22 pts.) - Demonstrate that you have the JDK available

Progress: 100%

Details:

- Run `java --version` in the terminal
- Run `javac --version` in the terminal
- Record the output (both should be the same version and yield no errors.)

```
C:\Users\Owner>java --version
java 24.0.1 2025-04-15
Java(TM) SE Runtime Environment (build 24.0.1+9-30)
Java HotSpot(TM) 64-Bit Server VM (build 24.0.1+9-30, mixed mode, sharing)

C:\Users\Owner>javac --version
javac 24.0.1

C:\Users\Owner>|
```

Output of version commands for java

⇒ Task #5 (2.22 pts.) - Reflection

Progress: 100%

Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

Your Response:

I had a lot of issues with getting Wakatime set up. I was following all of the steps, but my project was not showing up on the Wakatime website. I would click on the "0 sec" button in vs code and it would take me to a blank projects screen. Eventually, I deleted all of the waktime files and reinstalled it following the guide and my project appeared, but it was under the wrong name. I connected it to my github repository manually and renamed it, but I am still not fully sure if it is set up properly. Inside of the project, the only file being shown is the Wakatime files, but not any of my repo files. I learned about a lot of new extensions that can be helpful when creating large scale project and will likely use them for my other work.
